International BSc Engineering Sciences Programme

Hochschule Mannheim – Mannheim University of Applied Sciences offers Bachelor of Science programmes in Automation Technology and Power Engineering and Renewable Energies where the first year is conducted in English. From the third semester, the language of instruction is German.

Your complete application must reach our office by 15 May 2019.

Proof of sufficient English language skills is one of the admission prerequisites (for example TOEFL - paper-based minimum 550, computer-based minimum 213, 80 (IBT); IELTS minimum 6.0). Students who have studied for at least one year with English as the medium of instruction need to include proof of this in their application and do not need any other certification.

Due to the multitude of applications we receive each year, and as the number of students to be admitted is restricted, applicants should have a very good school-leaving or university graduation grade.

All our students have to pay administration fees of currently €152.20 per semester. Non-EU students additionally need to pay tuition fees of currently €1,500 per semester. As a requirement to obtaining a visa, you need at least €6,000 deposited in your bank account or a sponsor who can guarantee to finance your studies.

If you are interested in one of the above courses to start in Winter Semester 2019/20, starting beginning of September 2019, please download the application form from our website. As you can find all the necessary information on the internet, neither brochures nor application forms will be sent by post.

Please note that due to university admission regulations we cannot consider an application unless it is complete, i.e. a completed and signed application form, one passport photo, a curriculum vitae, a short motivational letter, certified copy of original certification of your academic qualifications, at least one reference letter from your teacher or professor, and proof of English language competence. Please only send notarised copies and no originals. There will be no return of application documents. We only accept applications by post, best by courier service, as we are unable to accept applications by e-mail.

Applicants from Bulgaria may apply with the certificate of winter semester of the 12th class.
